-Love the main photo used in Mockup B!
       -I think it would look really good in a website and mobile aspect
-I think combining the photo from Mockup B and the block texture in Mockup A would be a really cool idea
-the type for the website might be a little too big. Maybe try lowering the point size for the main text and captions
-I like that in Mock Up B, that the navigation bar is at the bottom!
-decide on how many pages you actually want to do!
       -we can cut down on how much information we use to make it time efficient!
